Summary

Software engineer who thrives working alongside customers to solve real problems. Experience deploying automation solutions on-site, integrating with legacy systems, and delivering measurable outcomes for Fortune 500 companies and startups alike.

Skills

Languages : C#, SQL, Python, JavaScript, Bash, PowerShell

Frameworks : .NET, Blazor, Node.js

Tools : Docker, Linux, Git, Azure, Nginx

Concepts : Client-Facing Engineering, Automation Deployment, Legacy Integration, RPA, API Design, CI/CD

Experience

Foxen *Aug 2023 – Present*

Senior Software Engineer

- Delivered full-stack features for B2B clients and end consumers, gathering requirements and iterating with stakeholders
- Modernized legacy codebase with reverse proxy and SDK standardization, delivering 15x latency improvements to customers
- Created reusable libraries and testing frameworks used across every service

Impower.ai *Mar 2020 – Aug 2023*

Automation Architect / RPA Developer

- Rotated through client engagements including Process Automation Engineer at Chipotle Mexican Grill
- Delivered automation that eliminated 10 planned new hires for a client engagement — working on-site with stakeholders
- Built lead-generation automation deployed at a law firm, processing thousands of daily prospects
- Designed container tracking integration for logistics company, combining scraping with API delivery
- Delivered compliance automation for Fortune 500 company, working directly with stakeholders to avoid litigation exposure

Projects

ffilt.us (Personal Blog) Python, MkDocs, Azure, GitHub Actions

Static site built with MkDocs, custom Material theme, automated CI/CD deployment on Azure

Education

Ohio State University *2014 – 2018*
Chemical Engineering
